A Briefing Guide to

Cybercrime

RAHMAN RAVELLI

Cybercrime

Cybercrime is an increasing problem that takes many forms. Even the slightest suggestion or risk of it affecting you or your business demands immediate, careful attention and an appropriate response to minimise the potential damage.

This is a rapidly-developing area. Nobody can afford to be oblivious to the dangers posed by cybercrime or approach them half-heartedly.

Anyone who believes that they may be facing a cybercrime risk or believes they need to take steps to ensure it does not become a problem must seek the assistance of a legal firm steeped in business crime expertise. A firm capable of providing the necessary specialist skills and knowledge that can ensure you do not suffer the effects of cybercrime or can respond appropriately if you are the subject of such allegations.

Our Online Expertise

Cybercrime is essentially any offence carried out using computers and, in many cases, the internet. Such cases require legal and technical expertise, intelligence and speed of thought. Rahman Ravelli's qualities in these areas are beyond doubt; our rankings in international legal guides are testament to that.

At Rahman Ravelli, our cybercrime expertise covers:

- Cyber fraud and theft
- Computer hacking and data privacy offences
- Malicious communications, cyber stalking and harassment
- Cryptocurrency
- Due to the means by which such offences are carried out, cybercrime is not defined by borders. There are also issues surrounding employee and company liability if allegations of cybercrime are made.

Which is why anyone involved in any way with a cybercrime investigation needs legal representation from lawyers who are experts in all aspects of such cases. Lawyers who know how to deal with national and international law enforcement agencies and have experience of extradition and disclosure matters anywhere in the world. At Rahman Ravelli, we offer all this.

Bespoke Teams

For clients who have suffered as a result of cybercrime, we create bespoke teams of experts and devise the most appropriate strategy and course of action in order to seek justice for you. Our expertise in planning and conducting internal investigations can determine the cause of the problem. Our asset tracing specialists will help locate, freeze and then recover assets lost as a result of online crime.

If the matter relates to cryptocurrency, our experts are on hand to offer the relevant advice. Please see the cryptocurrency area of our website for more details.

For clients accused of cybercrime, we use all our acknowledged skill in this rapidly-changing business and legal area to obtain the best outcome. Cybercrime

often involves cutting-edge technology. It is not uncommon for those in business to become unknowingly involved. And when they do they require expert help.

As business crime specialists, whose knowledge in this field expands with each and every development, we have a worldwide network of experts we can call on, making us the ideal choice to advise on any issue relating to online crime anywhere.

Whether it be addressing anti-money laundering, fraud or other criminal risks in relation to finance, representing those suspected of being involved in cybercrime issues, advising on precautionary measures or assessing the viability of a business or investment proposition, Rahman Ravelli has all the attributes required to help you plot the safest possible course through the online world.
